

1.

Index.js

```
express = require('express') const mongoose = require
('mongoose'); const Product =
require('./models/product.model.js'); const app =
express()
app.use(express.json());

//reading all products app.get('/', function (req,
res) { res.send("hello from the node api update");
});
app.get('/api/products', async (req,res)=> {
try { const products = await Product.find({});
res.status(200).json(products);
} catch(error){ res.status(500).json({message:
error.message});
}
});

//read api but by only one product
app.get('/api/product/:id', async (req,res) =>{
try{ const {id} = req.params;
const product = await Product.findById(id);
res.status(200).json( product );
} catch(error){ res.status(500).json({message:
error.message}); }
});

//creat api
app.post('/api/products',async (req,res)=>{ try{
const product = await Product.create(req.body);
res.status(200).json(product);
```

```

    }catch (error){ res.status(500).json({message:
      error.message });
    }
  });

  //update a product app.put('/api/product/:id',
  async (req,res) => { try { const{id} =
    req.params;

    const product = await Product.findByIdAndUpdate(id ,
req.body);

    if(!product){ return res.status(404).json({message:"Product
      not found"}});
    }

    const updatedProduct = await Product.findById(id);
    res.status(200).json(updatedProduct);

    }catch(error){ res.status(500).json({message:
      error.message }); }
  });

  //delete a product

  app.delete("/api/product/:id", async(req,res)=>{
    try{ const{id}= req.params;
      const product = await Product.findByIdAndDelete(id); if
      (!product){
        return res.status(404).json({message: "Product not found"}});
      } res.status(200).json({message:"Product deleted

        successfully"}});

      }catch(error){ res.status(500).json({message:
        error.message }); }
    } )

```

```

//here first i connected db and then listened to the port

mongoose.connect("mongodb+srv://akashvaddi333:K5m18vy6fB6aU7K2@cluster0.h
p9gamr.mongodb.net/Node-API?retryWrites=true&w=majority&appName=Cluster0")
.then(() => {console.log('Connected!');
app.listen(3000, () =>{ console.log('server is
running on port 3000') });
});
